Active Metal Fabrication Services

Active Metal, Inc. is best known for our premium display products, but we are first and foremost a full service custom metal fabricator. With over 72,000 sq. ft. of Manufacturing space and over 10,000 sq. ft. of Warehousing space, we are capable of handling your project needs.

The owners of Active Metal share over 125 years of metal fabrication experience. However, not only is Active Metal a metal fabricator, but we also have the capability to do CNC machining as well as Laser Engraving on materials such as wood, plastics, solid surface materials, and aluminum.

Our mission is to provide quality workmanship, on time, and at a fair price. Let us quote your next job and see the many capabilities and services Active Metal can offer you.

Visit our website to see examples of projects ranging from Retail Display Fixtures to custom metal fabrication projects.

Metal Fabrication Services

Full Service Custom Metal Fabricator and Premium Displays

Make Tomorrow's Ideas Today's Reality

Active owns the most accurate and fastest in computer controlled punching equipment. Our equipment reduces setup time and delivers accurate parts in amazing speeds which means your jobs come in on budget and on time.

WHAT ARE WE UP TO?

We have new and exciting projects lined up for the upcoming year and into the future, bring your ideas to us and see what Active Metal can do for you.

Active has the best in the forming/folding technology in-house, RAS Flexbend. This piece of equipment allows us to make precise bends at any degree and can fold up to 11 gauge steel. This machine can deliver tight and consistent tolerances ensuring your product is done right, the first time, everytime.

Active Metal now owns the latest in CNC technology. Our newly acquired Holz-Her 3 Axis Router allows us to bring your ideas to life out of wood, plastics, aluminum, solid surface, and other materials. This equipment allows us to engrave, rout, and cut materials with incredible accuracy and speed. With state-of-the-art design software we are able to get the job done right without sacrificing quality.
